Profile Summary

Motivated and detail-oriented **Junior Django Backend Developer** with hands-on experience in developing and maintaining backend systems using **Django, DRF, and Python**. Skilled in creating RESTful and custom APIs, integrating databases, and building automation workflows. Passionate about clean code, scalable backend design, and continuous learning in modern web development.

Work Experience

Django Backend Developer

June 2025 – Present

Humbingo Consultancy Services LLP, Anand

- Developing and maintaining **REST APIs** and custom backend modules using **Django** and **Django REST Framework (DRF)**.
- Worked on **Cypress** for automated testing and handled asynchronous communication using **WebSockets** and **Django Signals**.
- Utilized tools such as **Postman**, **Jira**, and **Open Project** for testing, tracking, and managing tasks in an agile environment.
- Designed and implemented **N8N Automation Workflows** to streamline internal processes.
- Collaborated with cross-functional teams to deliver efficient, secure, and scalable backend solutions.

Education

Master of Computer Applications (MCA)

Pursuing (Sem 2: 8.33 SGPA)

Gujarat Technological University, Gujarat

Bachelor of Computer Applications (BCA)

April 2024 — 7.66 CGPA

Sardar Patel University, Gujarat

Academic Project

Grocery Billing System

Developed a software application to manage grocery sales transactions, automate billing, maintain inventory, and generate customer invoices. Improved sales tracking and operational accuracy through efficient database management.

Technical Skills

Programming: Python, C#

Web Technologies: Django, Django REST Framework, HTML, CSS, JavaScript, Bootstrap, jQuery, Ajax

Databases: MySQL, PostgreSQL

Tools: Git, Postman, Jira, Open Project, Cypress, N8N Automation

Concepts: REST API, WebSockets, Django Signals, Software Development
