### SUMMARY

A detail-oriented computer science graduate with problem solving skills and intrested in web designing. My inspiration is to achieve success as a web developer, creative , innovative and efficient solutions that contribute to the ever-evolving world of technology.

### TECHNICAL SKILLS & TECHNOLOGIES

Web Design	Time management	HTML,CSS,JavaScript
Canva	C / C++, JAVA, Python	Database: MySQL, MongoDB
Team Work	ASP.net , ReactJS,PHP	Tool: VS Code

### EDUCATION

#### Master of Computer Application

2024 - Pursuing

Gujarat Technological University  
7.95 SPI Sem-III  
8.73 SPI Sem-II  
8.45 SPI Sem-I

Anand Institute of Management and Information Science

#### Bachelor of Computer Application

2021 - 2024

Sardar Patel University  
8.72 CGPA

Anand Commerce College

#### GHSEB

12th commerce  
66%

2020 - 2021

10th  
68%

2019 - 2020

### PROJECTS

#### • Web Based Student Feedback System With Sentiment Analysis (MERN Stack)

A Web-Based Student Feedback System with Sentiment Analysis (MERN Stack) allows students to submit feedback on courses and instructors through an online platform built using MongoDB, Express.js, React.js, and Node.js. The system uses sentiment analysis to automatically classify feedback as positive, negative, or neutral.

#### • College Management System (MERN Stack)

A College Management System (MERN Stack) is a web application built using MongoDB, Express.js, React.js, and Node.js that streamlines administrative tasks like managing students, staff, courses, and classes.

#### • Medicine Donation System (PHP)

A Medicine Donation System (PHP) is a web application that connects donors with NGOs for 1 efficient medicine distribution.
